PRODUCT CLEANING AND CARE

Roof Dome

The dome on the Solatube Daylighting System is designed to be self cleaning. However, if installed in an area with high debris build-up, the dome may need to be cleaned from time to time. To ensure that irreparable damage to the dome does not occur, the dome can be cleaned using a soft cloth with water and a non-abrasive mild soap or detergent followed by a thorough water rinse.

Tubeing

To clean the tubing, simply wipe with a soft cloth. **Do not** use any cleaning solution or abrasive material.

Diffuser

Brighten Up Series diffuser (Solatube 290DS and 160DS Daylighting System) after February 2011. This diffuser has six lugs and can be removed by turning anti-clockwise. The secondary lens can be removed by pulling gently on the protruding plastic tab. This will also allow access to the light fitting.

Ventilation Add On Kit

Clean the vent with a damp cloth.

Light Add On Kit

To replace the light bulb in a Solatube Daylighting System light fixture, follow the above instructions on how to remove the diffuser and replace the light bulb. Do not exceed 75 watts.

WARNINGS

Reroofing

Solatube® products require special care if removed for reroofing. In order to ensure proper removal and reinstallation, please call your Solatube Certified Installation Consultant or Hometech Ltd. If not removed by a Solatube Certified Installation Consultant, the warranty will be void.

For any further detail on the above, please contact Hometech Ltd on 0800 HOMETECH (0800 466 383) or visit our website at www.hometech.co.nz
