

# Xgen by Unovent®

## Home Ventilation System for Moisture Reduction

---

Xgen is an affordable positive pressure ventilation system taking fresh, filtered air from the roof space to inside your home, creating a well ventilated room. Controlled by an Unobrain®; a fully automated temperature and humidity sensor controller.

---

**Product suitability:**  
In any area that you need to manage condensation and mould growth

## Applications

Xgen by Unovent® can be applied to most types of residential buildings including standard single storey homes with or without a roof space, multi-storey single dwelling homes, tiny homes and multi-storey residential buildings. Minimum of 300mm roof cavity is required.

- Bedrooms
- Living Areas
- Hallways

## Installation

Undertaken by Unovent's nominated installer network or registered electrician.

## Electrical

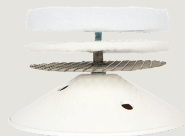

- A 12V power supply is plugged into a standard 230-240V AC three pin powerpoint. Any 240V wiring installation and power outlet installation must be carried out by a registered electrician.
- Up to 15 Xgen units can be powered by one 12V power supply and one Unobrain®

## Warranty

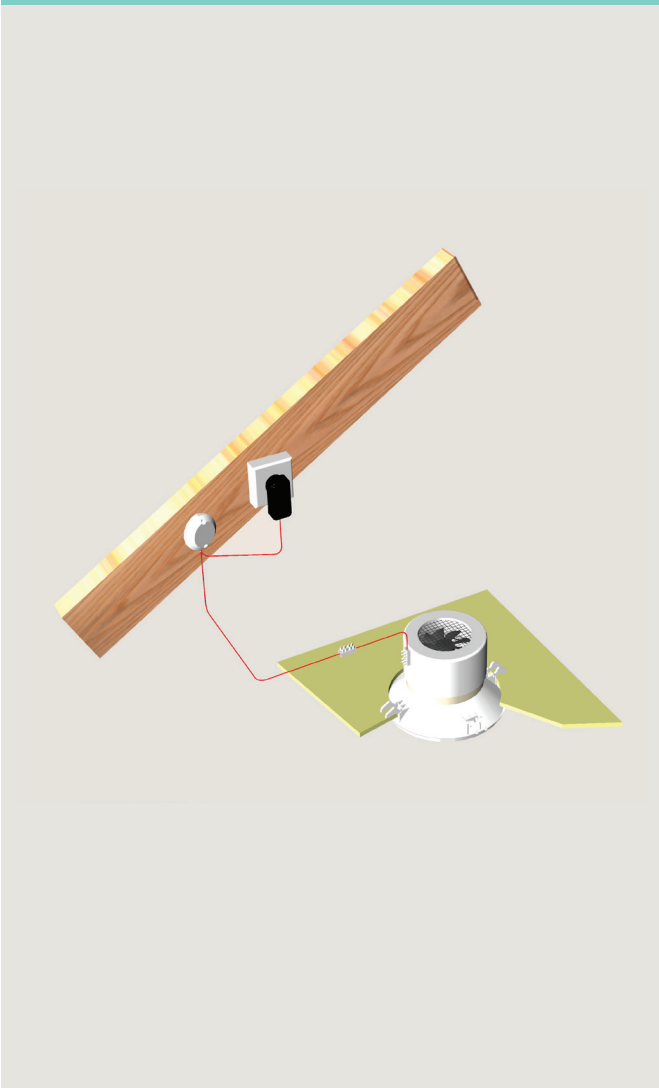

10 year warranty

## Components

The Xgen system can be installed as a single unit or up to 15 units can be linked together and controlled by one Unobrain.
